

This is an alkali based, unique degreaser-cleaner. It removes hard soot oil deposits from baking and frying wares such as ovens, grill and frying pans. It also removes other burnt on organic matter deposits. Frying and baking wares tend to develop thick hard to remove soot cum oil deposits, which reduce the efficacy of heat-transfer and affect finished product quality. Oven cleaner has a blend of mineral alkali and wetting agents which facilitate easy cleaning and maintenance of baking and frying wares and all other cooking wares this problem is encountered. Oven cleaner is both effective and easy to rinse.
